

Sustainable cities and communities - Indicators for city services and quality of life

SCOPE

This Jordanian Standard defines and establishes methodologies for a set of indicators to steer and measure the performance of city services and quality of life. It follows the principles set out in JS 2307 ISO 37101 and can be used in conjunction with JS 2307 ISO 37101 and other strategic frameworks

APPLICATION

This document is applicable to any city, municipality or local government that undertakes to measure its performance in a comparable and verifiable manner, irrespective of size and location
